

# CRESCENTA VALLEY WATER DISTRICT

## Well 5 Rehabilitation Project

Crescenta Valley Water District (CVWD) will be rehabilitating Well 5 as part of its FY 25/26 Capital Improvement Projects. Subsurface Technologies was awarded the projects in October 2025 and will conduct routine maintenance at the site starting in December 2025. The routine maintenance will enhance each well's functionality by restoring lost pumping capacity due to natural clogging of well screens over time. By improving the wells, the District can continue to supply the community with safe and reliable drinking water. Below you will find helpful information related to this project and how you may be impacted.

For exact locations, see the project location map below.

*Schedules are subject to change as weather and unforeseen circumstances are always a factor.*

### **WELL 5 CONSTRUCTION SCHEDULE:**

December 1, 2025- Anticipated start of construction

January 30, 2026- Estimated end of construction

Access for emergencies, mail delivery, and trash services will remain the same. Residents will have access to their properties. CVWD advises that residents avoid traveling through the construction zone whenever possible. In addition, the District will update construction schedules via CVWD's website ([www.cvwd.com](http://www.cvwd.com)) to inform the residents of any changes in the construction activities as the project progresses.

We are committed to minimizing traffic and parking inconveniences. However, as in most construction projects, this work will create a certain amount of unavoidable public inconvenience.

Potential Impacts:

- Expect more vehicles and personnel during work hours of 8:00am-4:00pm.
- Construction activities may result in higher noise levels and dust.
- There may be occasional traffic interruptions as construction vehicles enter and exit the site.
- Water service will not be interrupted during this project.

**We appreciate your patience and cooperation as we work hard to provide the community with a reliable source of water for future use.**
