Subject: **Notice of Construction** – 4-inch Water Main Replacement on Fierro Cir. Project I-1077.

Dear Resident:

Crescenta Valley Water District (CVWD) will construct 160 LF of new 6-inch water main on Fierro Circle. This is part of CVWD's ongoing pipeline replacement program (see project location map on reverse side).

Construction is anticipated to begin the week of April 22, 2024. CVWD crews will begin replacing the old 4-inch diameter water main on Fierro Circle. The water main was installed in 1961 and will be replaced with a new 6-inch diameter water main. Please visit CVWD's website at www.cvwd.com for updates on the construction schedule. We anticipate the entire pipeline replacement project to be completed by mid-May 2024.

Please note that there will be a period, usually between 4 to 6 hours, when the water service to your home will be shut off. This will occur when crews tie the new water main into the existing water main. CVWD will notify each resident a minimum of 48 hours before the actual shutdown, with a letter that indicates the date and time. Please sign up for Everbridge notifications on our website for the most up-to-date shutdown information.

CVWD crews will install temporary parking and traffic restrictions along Fierro Cir. This will allow our crews to work in a safe and expeditious manner to complete the project. Temporary "No Parking" signs will be posted a minimum of two (2) days before construction. We request that you observe these signs and any other traffic control. Driveways within the construction zone may be temporarily restricted due to the construction. CVWD's on-site inspector and crews will assist you with access into and out of your driveway.

We invite you to join us for an in-person community meeting at the La Crescenta Public Library on Wednesday, April 17, 2024, at 5:30pm. This meeting will provide you with the opportunity to meet with our staff working on the pipeline replacement project, discuss the construction, and answer any questions you may have. A separate invitation will be sent to you at a later date.

As in most construction projects, the work will create a certain amount of unavoidable public inconvenience. Your cooperation in making this project successful will be greatly appreciated. If you have any questions or comments concerning this project, please contact me by phone at (818) 236-4115 or email me at ckopelman@cvwd.com.

Very truly yours,

CRESCENTA VALLEY WATER DISTRICT
