

Water Meter Rates and Charges

Meter charges ensure that water is available for use at your tap whenever you need it, much like phone, cable, power or other utilities. Also known as fixed charges, they help pay for costs associated with operating and maintaining CVWD's water treatment and delivery system, and they are based on meter size.

Usage Rates And Charges

Usage rates cover costs that vary based on the amount of water delivered, such as imported water and electricity costs. These rates are separated into three budget-based tiers for single-family residential customers. The rates are uniform for multi-family, irrigation, commercial, and schools.

All rates are based on monthly usage

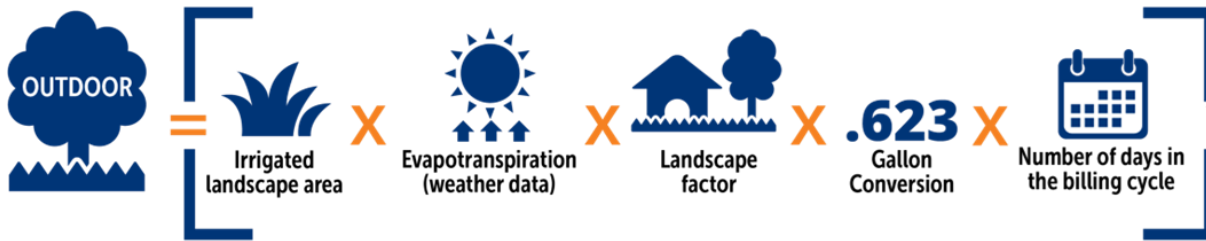

*1 unit =1,000 gallons

Single-Family Budget-Based Rates

Indoor water budgets are based on household size. The default household size is four (4). Variances to household size are processed upon request.

Outdoor budgets are based on irrigable area, calculated as 33 percent of the lot size, with a maximum of 4,353 square feet.
